Stay on track with nTrack

nTrack™ is a comprehensive solution that tracks, evaluates and reports on the student's clinical experiences and skills throughout their training program. This innovative tool saves time, reduces administrative burdens and increases productive interaction and feedback for both students and faculty.

With nTrack, students capture, via a mobile device such as an iPhone or desktop computer, complete information about each patient encounter right at the point of care. Information captured is HIPAA compliant and secure. Periodically, students sync their devices to upload their clinical experience information to a secure online web-based repository. The information stored on the secure server remains accessible via password-protected log-in for additional student edits and faculty review and evaluation.

nTrack is fully integrated with Skyscape's over 500 trusted clinical information resources a value proposition unavailable with any other tracking software. Students can use Skyscape's patented SmartLink™ technology to link from nTrack to clinical, drug, lab and other information as they are working with patients. This unique combination of clinical resources and experience tracking ensures that students will deliver the highest quality of care and achieve the most learning with each patient encounter.

Why Skyscape?

- Customizable solution
- Integrates with trusted resources from publishers you already use: F.A. Davis Company, Jones and Bartlett, LWW, Mosby, Saunders & many more
- Available on Palm OS®, Windows® Mobile, Windows® powered desktop and Tablet PCs, iPhone/iPod Touch coming soon
- Free evaluation copies of any of our resources
- Hosted by Skyscape requires little to no involvement of your IT resources
- Free training for faculty and students (onsite option available)
- Generous discounts on software and hardware bundles
nTrack offers many benefits to both students and faculty

Benefits for Students:
- Tracks both clinical experiences and skills throughout their training program
- Relieves student paperwork burden, enabling increased focus on patients
- Saves time
- Increases accuracy and supports full compliance with reporting requirements
- Secure access on both the mobile device and website
- Provides documentation for student portfolios when applying for employment post-graduation

Benefits for Faculty:
- Customizable for your program and institution
- Option to utilize NANDA guidelines for coding
- Built-in faculty evaluation forms
- Evaluations and comments can be entered, reviewed and signed online in near real-time
- Enables clinical preceptors to provide ongoing feedback and guidance throughout the course
- View individual student performance as well as aggregate data across the program
- Offers easy access to performance data required for program accreditation
- Preconfigured reports in Excel format available via e-mail

Best of all, the nTrack infrastructure is hosted at Skyscape's facilities, making it easy to implement and utilize without burdening your IT resources.
